

## **Dissemination of the project "Yakala Rhythms - Catch the rhythm" (E-Twinning Platform)**

Teacher: Oltean Diana Ionela  
Kindergarten with P.P "Arici Pogonici", Gherla, Cluj County, Romania

E-Twinning is much more than a dedicated platform for teachers in Europe to communicate, collaborate and start projects. From my point of view, this platform contributes to the development of teachers' skills, giving them the opportunity to broaden their horizons of knowledge.

The project "Yakala Rhythms - Catch the rhythm" was a project about music, rhythm and music games, which managed to capture the attention of preschoolers through the variety of interactive activities proposed. The Ritmi Yakala project helped me love music much more, developed my creativity and digital skills, through the applications and programs used. The team of this project was made up of very talented teachers from Turkey and Romania. I find it fascinating how, initially, a group of people who did not know each other, ended up becoming best friends and collaborating for a high quality educational process.

In this project I had the honor to learn from teachers eager to share their knowledge, I used interesting digital programs such as: Canva, Moment Cam, Chatter Pix, Story Jumper, Quiver, etc. The preschoolers were delighted by the activities with musical games such as: "Dancing with the bags", "Dancing with the circles", 3D coloring activity and visualization of the work on musical background through the Quiver application, musicograms, puzzles with Romania-Turkey flags, etc. . In this project, I highlighted my digital knowledge in the Cava application, my passion for rhythm and dance, along with my creativity and ability to adapt quickly.

Personally, I am grateful to the coordinators of the "Ritmi Yakala" project for all the ideas shared and I believe that E-Twinning is the way to a lifelong learning for all teachers.
