

# **PRODUCING HANDS – eTwinning project**

## **ABOUT THE PROJECT**

Art is an expression of creativity and imagination. We aim to develop the algorithmic thinking of children by using various kneading materials (salt ceramics, clay, plaster, paper-mache, etc.), and at the same time contribute to their affective development by generating creative and original products.

We expect children to create original products with the materials determined every 15 days from March, both in the distance and face-to-face education.

## **OBJECTION**

- \* Development of creativity and imagination.
- \* Development of algorithmic thinking.
- \* Learning by doing and experiencing.
- \* Creating new and original products.
- \* Providing emotional development.
- \* Providing hand-eye-muscle coordination.
- \* Increasing awareness and attention.
- \* Learning to explore.
- \* Reinforcing learning.
- \* Working with the group and ensuring that they belong to the group.

## **WORKING PROCEDURE**

- \* Project plan
- \* The distribution of tasks
- \* Preparing a poster and logo
- \* Preparing permit documents
- \* Integration with the curriculum
- \* Internet Safety
- \* Meeting partners
- \* Meeting with students
- \* Promotion of schools
- \* Dissemination studies
- \* Surveys
- \* Meetings
- \* Planning of events

- \* Web 2.0 tools and collaborations
- \* Evaluating parents, students, and teachers
- \* Creating a joint product
- \* Product exhibition.

## EXPECTED RESULTS

- \* To increase children's interest in art and to produce creative products.
- \* To provide algorithmic thinking.
- \* Observing product diversity of children of different age groups using the same materials.
- \* Contributing to emotional development.
- \* Contributing to learning by doing and living.
